

GENERAL EXPLANATION

This training set is designed to show the household natural gas installation and its connections. It consists typical kitchen and bathroom fittings for natural gas.

EXPERIMENTS

1. Construction of natural gas set-top hob connection
2. Connection of natural gas stove
3. Testing the natural gas leakage safety system
4. Calculation of gas consumption amount

DIMENSIONS

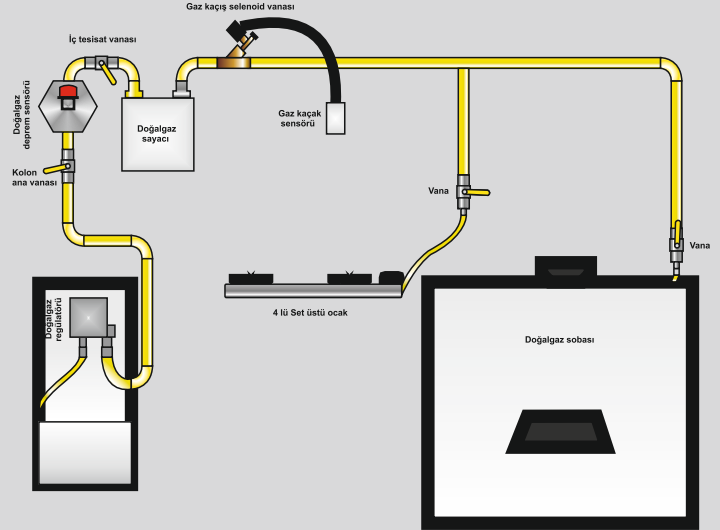

A x B x H : 2000 x 750 x 1500 mm

OPTIONAL FEATURES

- Touch LCD Display
- USB Computer Connection
- Computer Control

TECHNICAL SPECIFICATION

The household natural gas plant consists of natural gas stove, set top cooker, natural gas regulator, natural gas counter, gas leak sensor, earthquake sensor, solenoid valve and spherical valve.

TECHNICAL DETAILS

- Natural gas powered gas cut-off solenoid valve
- Natural gas powered earthquake sensor
- Gas leak alarm system
- Set top hob and connections
- Natural gas regulator
- Household gas counter

PACKAGE INCLUDED

Device, device cover, 1 printed experiment report, circuit diagram and product catalog
