

**GENERAL EXPLANATIONS**

This training set is designed to operate an engine with a sequential LPG system prepared to demonstrate the principle.

TECHNICAL SPECIFICATION

Engine cylinder volume is between 1000-1600 cc. 16 valves. It is an engine and works with a sequential LPG system. LPG system has a control unit and is equipped with a diagnostic device. It is suitable for communication.

TECHNICAL DETAILS

1000-1600cc engine

Electronic ignition system

Water cooled system

ECU controlled LPG system

Minimum 10 lt fuel tank

20-40 lt LPG tank

Communication with the diagnostic device

12V 60A power connection

PACKAGE INCLUDED

Device, 1 test sheet, product catalog
