

**GENERAL EXPLANATIONS**

This training set is used for walking hydromotor. To show the working principle has been prepared.

TECHNICAL SPECIFICATION

Pressurized in hydraulic system as the energy of fluids defined hydraulic energy. turn into circular motionsystems used for hydraulic motors; strong circularin work machines where movement is required, used in machine tools etc.

TECHNICAL DETAILS

**The hydromotor is cut.
It has valves and control mechanism.
It is on the coffee table.
Device that can be moved manually
Moving parts are visible.
Sectional parts are painted in ergonomic colors.**

PACKAGE INCLUDED

Device, 1 test sheet, product catalog
