

GENERAL EXPLANATIONS

In this training set, it is aimed to introduce the electrical connections used in video intercom systems and to show the working principles.

TECHNICAL SPECIFICATIONS

Security and Building Automation Systems Application Sets have a modular structure. Modular experiment modules are capable of performing system applications by making the desired energy and installation connections on the laboratory table with AC / DC energy unit. Modules are made of compact laminate material. There is a slide system for the modules to be disassembled and installed and moved. Laboratory table Single-phase AC / DC energy unit, table frame designed with aluminum profiles and floor adjustable rubber feet.

DEVICE DIMENSIONS

A X B X H : 1520 x 660 x 1740 mm

TECHNICAL DETAILS

- Video Doorphone Flat Module
- Magnetic Door Automatic Module
- Bell Button Module
- Video Doorphone Doorman Module
- Video Doorphone Door Panel Module
- Video Doorphone Energy Module
- Video Doorphone Switchboard Module

GIVEN WITH

- 4mm shielded 100cm born cable red 14 pcs
- 4mm shielded 100cm born cable black 11 pcs
- 4mm shielded 50 cm born cable green 5pcs
- 4mm shielded 50 cm born cable blue 5 pcs
- 4mm shielded 50 cm born cable yellow 10 pcs

PACKAGE INCLUDED

The device, 1 printed user manual.
