

GENERAL EXPLANATION

This training set is prepared to show the working principle of PLC systems that are frequently used in places such as industry and factories.

Optional Features

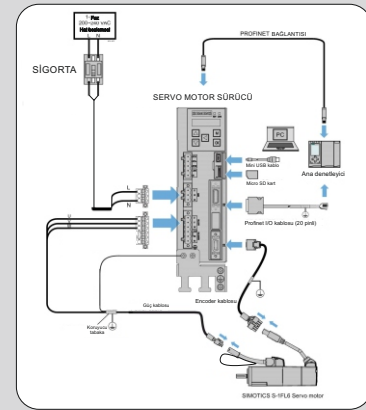

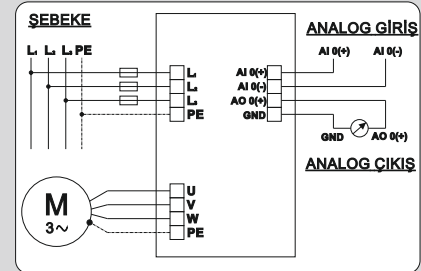

- Touchscreen LCD
- USB Computer Connection
- Computer Control

Package Included

Device, device case. 1 printed experiment sheet, circuit diagram and product catalog

TECHNICAL SPECIFICATIONS

S7-1500 PLC provides the control of different types of sensors used in most factories and systems and motors such as servo motor, step motor, AC motor. This training set was produced in an easy-to-connect way to observe these applications.

TECHNICAL SPECIFICATIONS

- Servo motor driver
- AC motor drive
- Step motor
- Capacitive sensor
- Inductive sensor
- Retroreflective sensor
